ABOUT ME

I am a dedicated and passionate cybersecurity professional. My unique background in business ownership and working in the MSP/MSSP field gives me unparalleled experience when considering business aspects, as well as technical, making me a fantastic asset to your organization.

WORK EXPERIENCE

SOC Analyst II

2021 - Present

Green Cloud Defense, United States

- Train new Tier 1 and Tier 2 SOC Analysts
- Perform host-based analysis, artifact analysis, network packet analysis and malware analysis in support of security investigations and incident response
- Created SOPs related to daily operation and provide feedback on current processes to maximize efficiency
- Identify, collect, and analyze threat intelligence from internal and external sources
- Investigate, document, and report on information security issues and emerging trends

NOC Technician

2019 - 2020

Imprezzio, United States

- Monitored LogRhythm SIEM and responded to alerts
- Handled creation and termination of Active Directory accounts
- Provided systems support for various building tenants
- Monitored company applications for availability
- Created centralized monitoring stack utilizing Grafana, Prometheus and several available plugins with Docker on CentOS 8
- Automated alerting using Power Automate and Opsgenie
- Interfaced with client IT support to maintain availability of Imprezzio's applications

Chief Executive Officer

2019 - Present

Digital Edge LLC, United States

- Manage IT infrastructure for several local companies
- Configure and maintain cloud deployments of client applications
- Analyze current infrastructure and recommend solutions to clients
- Create security SOPs around business needs and risks
- Perform security posture assessments and report findings with remediation suggestions
- Procure hardware and software licensing for client business needs

WORK EXPERIENCE

Technology Director

2019 - Present

KleinHacks, United States

- Maintain current Azure/M365 tenant
- Ensure student projects are aligned with current best practices
- Oversee implementation of tools, features and events to meet Klein ISD cybersecurity requirements
- Directly supervise students within the Technology Department to maintain a good, secure learning environment and ensure department efficiency

Network Engineer

2018 - 2019

ABC Office Equipment, United States

- Managed and maintained all aspects of client Active Directory installations
- Planned and executed on-boarding of clients
- Setup and configured networking for small and medium businesses
- Maintained hardware and network installations on a wide range of equipment and software
- Configured clustering and failover systems to achieve high availability
- Appropriately handled and managed client passwords
- Securely designed and maintained a highly available multi-tenant hardware management suite

EDUCATION

Bachelors in Cyber Security

Western Governors University, 2019 - Present

Network and Systems Administrator Cert

New Horizons CLC, 2018 - 2018

CERTIFICATIONS

CompTIA

- A+
- Network+
- Security+
- PenTest+
- CySA+

Miscellaneous

- Google IT Support Specialization
- FEMA ICS-100

SKILLS

- Risk Assessments
- Vulnerability Management
- Systems Engineering
- Network Security
- Basic Penetration Testing
- Incident Handling
- Risk Management
- Working Python Knowledge

SOFTWARE

- FortiEDR, FortiSIEM, FortiOS, FortiDeceptor
- Swimlane SOAR
- Metasploit
- Kali Linux
- Burp Suite
- LogRhythm SIEM
- SentinelOne EDR/XDR
- NMAP
- Wireshark
